

1. Requirements

After installing the Print-2-Fax application & driver on Windows or Linux system, Then users will have the option to send **Any-Web-Page or TXT/PDF/TIFF/JPEG/PNG/DOC/DOCX** files as fax from a website or from desktop by using ICTCore API. And also view the status of sending Fax on application.

The application should be user-friendly and meet the specified functional requirements.

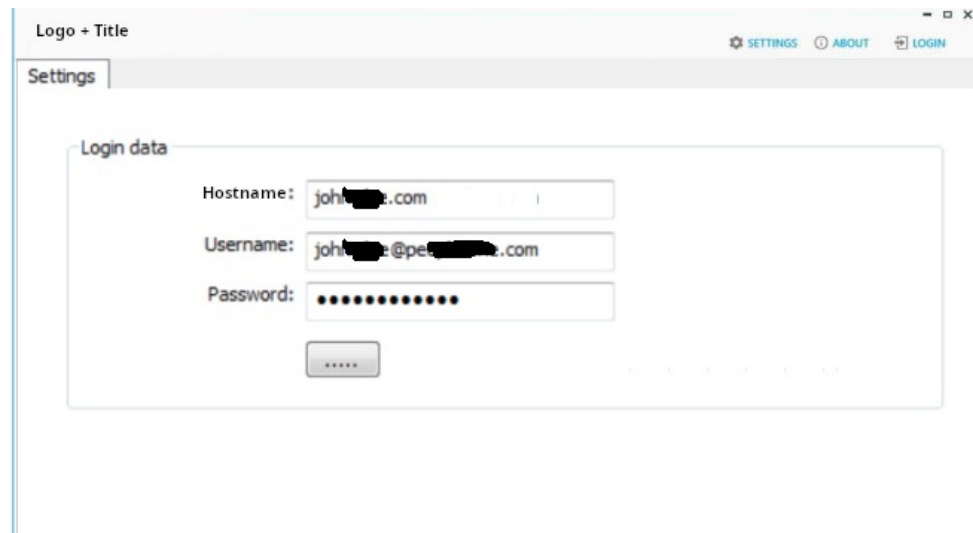

2. Application

After installing the driver & App, users will have the following options in application:

Setting

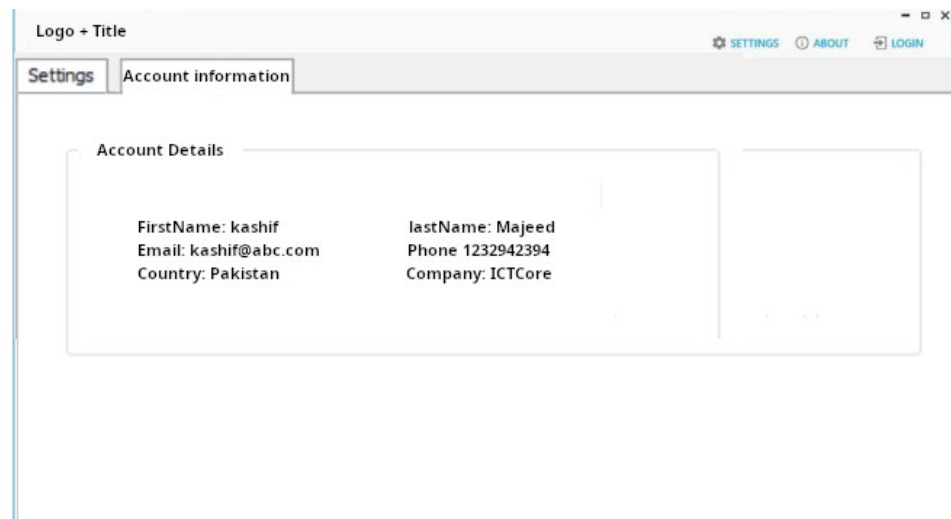

Users can enter their account information for authentication.
(API/Web address, Username, Password)

The screenshot shows a web application window titled "Logo + Title". In the top right corner, there are links for "SETTINGS", "ABOUT", and "LOGIN". The "Settings" tab is active. Below the tab, there is a section titled "Login data" which contains three input fields: "Hostname:" with the value "john[REDACTED].com", "Username:" with the value "john[REDACTED]@pe[REDACTED].com", and "Password:" with a masked password "*****". Below these fields is a "LOGIN" button.

Account Information

After successful authentication, the user's information will be fetched and displayed.

The screenshot shows the same web application window, but now the "Account information" tab is active. Below the tab, there is a section titled "Account Details" which displays the user's information in two columns. The left column contains "FirstName: kashif", "Email: kashif@abc.com", and "Country: Pakistan". The right column contains "lastName: Majeed", "Phone 1232942394", and "Company: ICTCore".

Outbound Faxes List

Display the last 10 print-2-faxes with their status. Add a refresh button to load new status or set a timer for auto-refresh so that the status is automatically fetched and updated from the API.

Logout

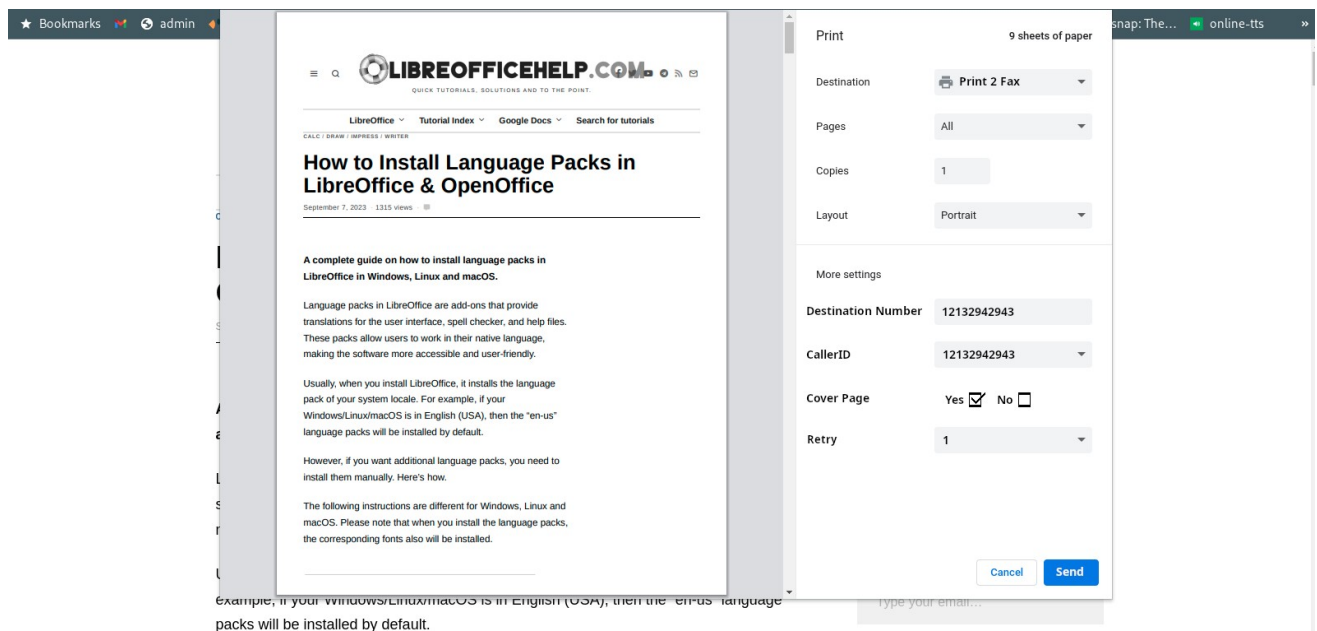

User can also have the option of logout from application.

3. Details

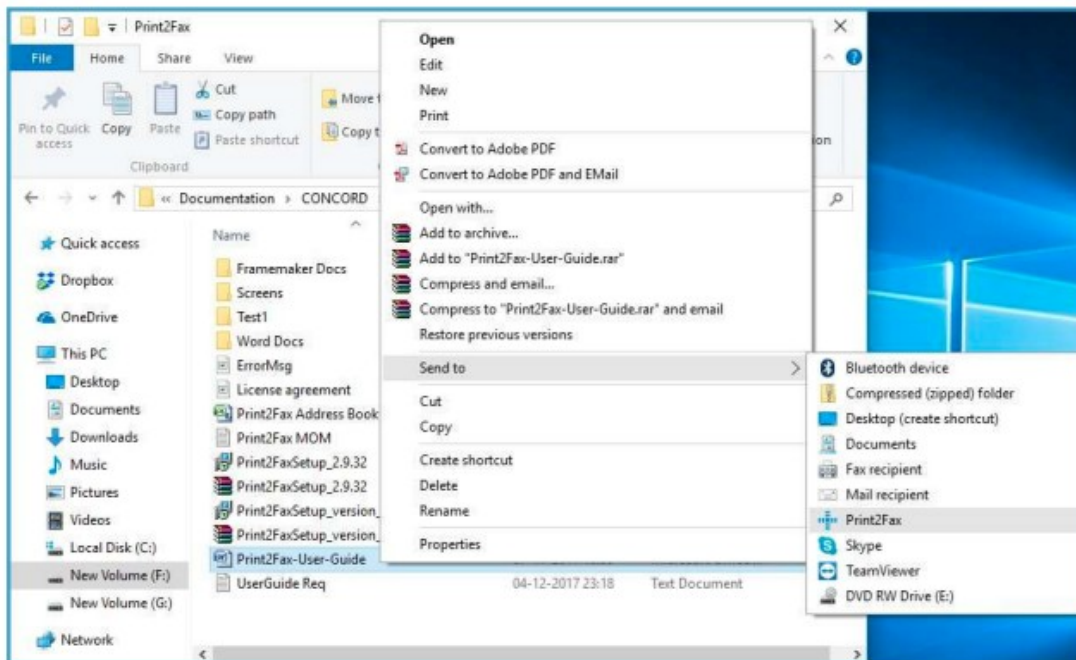

1. From Browser: if the user right-click and select "Print-2-Fax" option. The system will display the "Print-2-Fax" screen where user can enter the following information

- **Name/Title entry**
- **Destination number (enter contact related information while sending from application instead of browser)**
- **CallerID/Account Number selection**
- **Cover-Page checkbox**
- **Retry option selection**

Users need to enter all the above information and click on the send fax button. So the selected page will be uploaded as a document and Fax Transmission will be started.

2. Direct from File: However, if the user right-clicks on **TXT / PDF / TIFF / JPEG / PNG/ DOC / DOCX** files and selects the "Print-2-Fax" option, the application will be displayed where the user can enter the above information to send a fax.
